AT A GLANCE

Find the machine for your line

Six machine families, from compact start-up units to 240-carton-a-minute lines. Every machine is built to your pack and can link with upstream and downstream equipment.

Model	What it does	Output	Page
MPTR 40/25	Rotary tube filler	25 to 40 tubes / min	3
MPTF 60 / 120	Tube filler, single and dual head	40 to 120 tubes / min	4
MVC-R40	Compact rotary cartoner	Up to 40 cartons / min	5
MVC-140	Vertical cartoner	60 to 140 cartons / min	6
MPC-120	Horizontal cartoner	100 to 120 cartons / min	7
MPC-200 / 240	High-speed horizontal cartoner	Up to 200 / 240 cartons / min	8

What goes in the tube

Toothpaste, creams, ointments, gels, colours, paints, adhesives, lubricants and food pastes, in laminated, plastic and aluminium tubes.

What goes in the carton

Bottles, blister packs, aluminium strips, vial and ampoule trays, eye-drop vials, tubes, soaps and pouches.

ROTARY TUBE FILLER

MPTR 40/25

A user-friendly machine for filling, sealing, folding and crimping laminated, plastic and metal tubes.

Toothpaste | Shaving cream | Cold cream | Ointments | Colours & paints | Adhesives | Food pastes | Syrups

Specification

Output	25 to 40 tubes / min
Attendant	1 to 2 operators
Power	1.2 kW
Floor space	2200 x 1200 mm
Height with hopper	2200 mm
Net weight	800 kg

Salient features

- Hot-air sealing for laminated and plastic tubes
- Adaptable for aluminium tubes
- Logical electrical controls
- GMP-standard finishing
- Adequate safety features

Optional

- Cassette infeed for tubes
- Jacketed product hopper and stirrer
- Tube print-mark orientation device
- Tube transfer device
- Cap tightening and tube cleaning device
- End ejection

TUBE FILLER FOR LAMINATED, PLASTIC AND ALUMINIUM TUBES

MPTF 60 / 120

Fills creams, pastes, gels, lubricants, adhesives, colours, paints, ointments and other viscous products. Output up to 120 tubes a minute.

Particulars	MPTF 60	MPTF 120
Output per minute	40 to 60 tubes	80 to 120 tubes
Attendant	1 operator	1 operator
Main machine power	1.2 kW	1.2 kW
Floor space	1600 x 1370 mm	2133 x 1370 mm
Height with container	2640 mm	2640 mm
Gross weight (approx)	950 kg	1200 kg

Salient features

- Tubes fed automatically from an inclined cassette
- Magnus Fill system: progressive filling, no air trapped, clean closure
- No tube, no fill: filling disengages when a tube is missing
- Tube ends folded to your pattern, with or without crimping; batch coding on the closure
- Product-contact parts are rustproof and easy to remove for sterilisation
- One operator, even at maximum output
- Viscosity unaffected; easy pump cleaning for quick change-over
- Quick change from one tube size to another
- Tube registration by photo-electric scanner
- Discharge can suit any method of cartoning

Special equipment: cream stirrer and heating, jar fittings and discharge attachment, tube transfer and counting device, hopper flange connector, nitrogen flushing.

COMPACT CARTONER

MVC-R40

A compact rotary cartoner with up to 12 operating stations, loading by hand or automatically.

40 cartons per minute, up to

12 operating stations

500 cartons in the magazine

350 kg approx. weight

Specification

Drive	12-position indexer, AC motor, VFD
Carton length	13 to 127 mm
Carton width	13 to 101 mm
Carton height	50 to 380 mm
Footprint	1081 x 1105 mm, 2054 mm high
Frame	Stainless steel
Controls	Delta / Siemens / Schneider, touchscreen HMI
Supply	120 V 1-ph or 240 V 3-ph, 15 A; air 90 PSI, 10 cfm †

Main features

- Rotary intermittent motion, manual or automatic loading
- Cartons erected into buckets and held by suction cups
- Hot-melt or fold-and-tuck closing (airplane or reverse)
- Anodised aluminium and stainless steel, interlocked polycarbonate guarding
- Ergonomic, compact footprint, optional casters

Stations for options

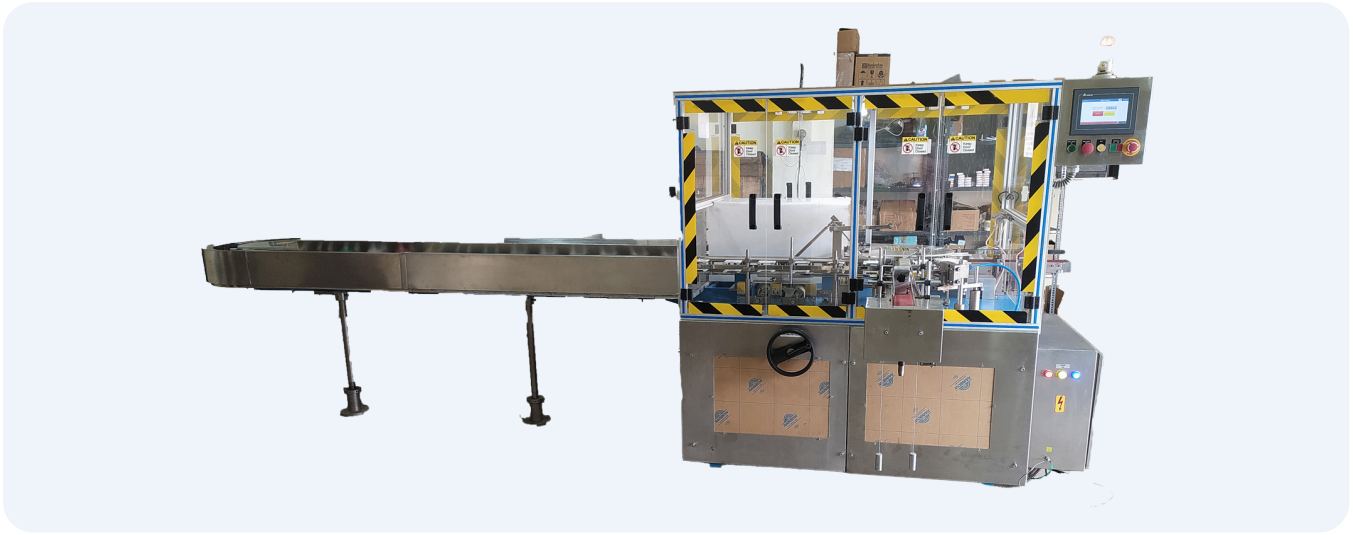

Leaflet insertion · Printer · Barcode reader · Open-flap detection · Missing-product detection · Automatic reject

† Electrical supply as printed in the earlier datasheet; to be confirmed for India before print.

VERTICAL CARTONATOR

MVC-140

Up to 140 cartons a minute, adjustable from 60. Products load into an open carton by pick-and-place or by hand, with room for two people on each side.

Specification

Mechanical speed	Max 140 cycles / min
Carton length	50 to 250 mm
Carton height	12 to 50 mm
Carton width (fixed)	25 to 90 mm
Carton board	Min. 280 GSM ITC board, grain perpendicular to length
Air	40 L / min at 6 kg / cm²
Power	3 kW; 3-phase, 50/60 Hz †
Weight	800 kg (gross 1000 kg)
Dimensions	1500 W x 4000 L x 1600 H mm (tentative)

Salient features

- Intermittent or continuous motion, variable speed
- Glue sealing (optional) or tuck-style closure
- Left-hand load, straight front discharge
- Separate vacuum pumps for carton pick-up
- All guards in SS 304; polycarbonate or acrylic doors with interlock sensors

Optional

- Batch coding device, ink-jet integration
- Automatic product feeding
- Leaflet insertion system
- Pharmacode / barcode reader

How it works

1 Carton lifted from the magazine by a reciprocating vacuum system

2 Erected and placed on a continuously moving chain

3 Product loaded by your pick-and-place or by hand

4 Carton carried through and tucked closed or pressed between end belts

5 Finished cartons delivered at working height

6 Exit conveyor to your next station

† Supply voltage was printed as “4400V” in the earlier catalogue; to be confirmed before print.

AUTOMATIC HORIZONTAL CARTONATOR

MPC-120

Continuous-motion cartoning at 100 to 120 cartons a minute, with steady, reliable running at rated speed.

An optimum choice for plastic and glass bottles, blister packs, aluminium strips, ampoule and vial trays, eye-drop vials, tubes, soaps and pouches. The standard machine handles reverse-tuck cartons; with a gluing device it handles glued cartons. It can be linked with upstream and downstream machines for line automation.

Specification

Mechanical speed	120 cycles / min
Carton board	250 to 350 g / m²
Carton min (L x W x H)	70 x 25 x 14 mm
Carton max (L x W x H)	250 x 85 x 60 mm
Air	40 L / min at 6 kg / cm²
Power	3.5 kW; 220 V AC, 50/60 Hz, 3-ph
Weight	1000 kg (gross 1200 kg)
Dimensions	1500 W x 4000 L x 1800 H mm

Salient features

- Continuous motion, variable speed
- Glue sealing (optional) or tuck-style closure
- Straight front discharge
- No product, no carton
- Separate vacuum pumps for carton pick-up
- Internationally accepted electrical components
- Stations laid out one after another, for easy setting

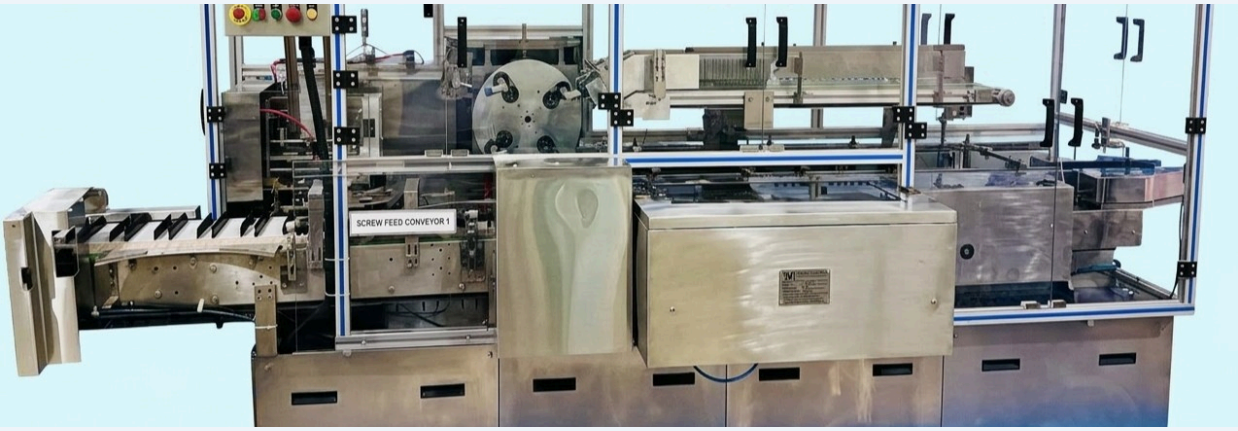

Optional

Leaflet inserter | Tube / bottle / pouch transfer | Batch coding, ink-jet | PLC touchscreen | Output counting | 21 CFR Part 11 | OCR / OCV | Pharmacode, 2D code reading | Camera vision

HIGH-SPEED HORIZONTAL CARTONATOR

MPC-200 / 240

Up to 200 or 240 cartons a minute for high-volume pharmaceutical and consumer lines.

Particulars	MPC-200	MPC-240
Speed	Up to 200 cartons / min	Up to 240 cartons / min
Pitch	4″ (101.6 mm)	4″ (101.6 mm)
Carton width	20 to 95 mm	30 to 70 mm
Carton length (3-chain)	75 to 150 mm	75 to 150 mm
Carton height	16 to 65 mm	20 to 50 mm
Dimensions (L x W x H)	4500 x 1500 x 1600 mm	6000 x 1500 x 1600 mm
Power	3 kW	3 kW
Air	5 CFM at 6 bar	5 CFM at 6 bar

Salient features

- Extended carton magazine
- Rear pusher station
- Four-arm rotary pick-up system
- No product, no leaflet, no carton logic
- Modular product conveyor design
- Easy access for maintenance
- 7″ touchscreen
- Options for maximum carton length
- cGMP model

Attachments

Blister transfer | Soap transfer | Tube transfer | Bottle transfer | Vial transfer | Aluminium strip transfer | Leaflet / booklet insertion | Vision systems | OCR / OCV | 21 CFR Part 11 | Pharmacode / barcode reader
